Justin St-Pierre creates a contrast between the simplicity of the instrument and the complexity of his music. He offers an unique musical journey and an

impressive visual performance. His third album, The Islander, inspired by the city of Montreal and the island of New Caledonia, was published in fall 2015.

Since then, Justin St. Pierre travels the world in search of inspiration and multi-cultural sharing. Based in France, the artist is touring in USA, Canada and Europe.

The Show « L'Insulaire » (The Islander)

The music of Justin St-Pierre is a mix of classic, contemporary jazz and fingerstyle. The third album of the artist, The Islander, subtly touches the heart and soul. Justin St-Pierre plays on a single instrument, his Sheldon Schwartz guitar ... Yet! Between melody, bass and percussion, it is hard to believe that everything happens at the same time in front of you. His music is above all an invitation to travel, inspired by the places and feelings crossed over time. Composed of both instrumentals and cover songs, we discover with delight that the artist also has a warm, captivating voice. Let yourself go ...

Reviews

Sheldon Schwartz (Canadien luthier) : « From swirling, hypnotic melodies to powerful emotional and passionate imagery. There's no class you can take, no book you can read and no video you can watch that will instruct you on how to make your compositions come from the heart, play so expressively and touch listeners so deeply. But obviously Justin has an innate ability to tap into the creative spirit of the universe and write music on his guitar with it. Wow! »

L'Indice Bohémien (Culturel Magazine from Quebec) :

« Imagine a gray, rainy autumn day.. The temperature is a little lower than average. You are looking for a little comfort and warmth, so you put a fleece clothing, comfortable, which has a sentimental value. Very soon, you feel a complete sense of comfort and well-being is felt. Well, that's exactly the impression of sweet bliss that comes from the latest album from Justin St. Pierre, released in 2015, The Islander.

The contemporary jazz style acoustic album warms the soul of the music lover as the mug warms the hands of the coffee lover. The mind escapes into deep thoughts of his « fingerstyle », light and powerful at once. Justin St-Pierre masters his guitar vibrato from the strings to the percussive slap. You would not need anymore this old wool jacket you wore during the gray days. Warm your soul and let be sloothed by the melodies of The Islander. The songs L'Île (The Island) and Libre Penseur (free thinker) will go straight to your heart. . 4.5/5 »
